Digital Photo Albums

(NAPSA)—Many priceless pictures and timeless memories are once again seeing the light of day, rather than being packed away in dusty photo albums. All it takes is a digital camera and a few online tools—and you can be sure precious photos will always look their best.

Cool Web sites let people preserve and share their favorite photographs.

There are even free Web sites that offer simple, fun ways to enhance and share photos. For example, NikonNet offers photo album CDs, which are great for sharing with others, and for archiving photos to preserve the memories. These inexpensive CDs play albums exactly as they appear on the Web—complete with customized backgrounds and personal captions—and don't require an Internet connection.

Photo album CDs make terrific gifts for holidays and special occasions, but are also great for preserving family vacations, parties and other memorable events.

So, if you're looking to do more with your photographs, an online photo site like NikonNet, plus photo album CDs, can be just the thing to bring your pictures to life.
