CAR CARE CORNER

DRIVERS WHO ARE CONCERNED ABOUT THE ENVIRONMENT OFTEN USE FUELS THAT CONTAIN ETHANOL. HOWEVER, ETHANOL IS A SOLVENT THAT CAN LOOSEN DEBRIS FROM THE FUEL TANK THAT CAN END UP IN THE ENGINE. ETHANOL ALSO ATTRACTS MOISTURE, WHICH CAN PREVENT AN ENGINE FROM RUNNING PROPERLY. THAT'S WHY MANY DRIVERS ADD A FUEL STABILIZER AND OTHER ADDITIVES THAT ARE FORMULATED TO ADDRESS ETHANOL-RELATED ISSUES. FUEL MED R-X AND ENGINE MED R-X HAVE INGREDIENTS THAT HELP PROTECT ENGINES THAT RUN ON GAS, SUCH AS MOTORCYCLES, A-T-Vs OR CARS AND WATERCRAFT. LEARN MORE AT YAMA-LUBE--DOT--COM.
